## The Problem

DeFi space is growing incredibly fast, and it's becoming harder for the casual investor to keep pace. With the Ethereum network becoming extremely congested, gas prices are catastrophic for DeFi yield investors. Other Vault projects have failed to bring a fresh mindset to the arena and include other products like NFT's.

## NFT's:

Gaming

Collectibles

Licensing

Identification

## The Solution

Capitalize on DeFi yields without spending time searching for the best investment. With community governed strategies, investors can capitalize on a batch of DeFi yield products. Spreading funds across the sector is automated, minimising risks and management time. Some products even grant exposure to NFT's — a popular trend growing every day. The most important part of resolving high gas prices is building platform over BSC (Binance Smart Chain).

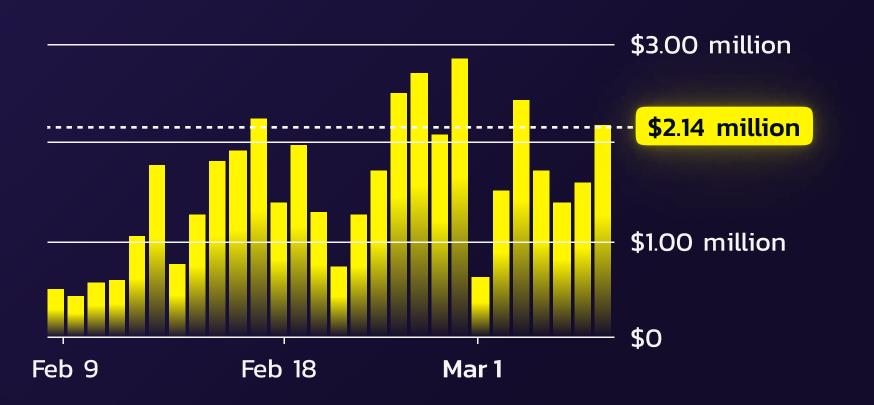

#### **Statistics**

A few statistics about the non-fungible token market as a whole.

Trading volume (30 days)	\$40.58M
(\$) NFTs	375,365
O Dapps	18

## **Total NFT trading volume**

The historical trading volume of all NFT tokens combined.

# Vision

The vault's idea is simple – the vault is a gate for every DeFi instrument/yield opportunity. Moreover, Vaulty is the first vault service that offers NFT staking and NFT's reward besides regular yields. Demand for NFT's is immense, as demonstrated through high resale prices on markets like Opensea, Treasureland and Rarible.

# Internal NFT ecosystem of Vaulty

# Vision

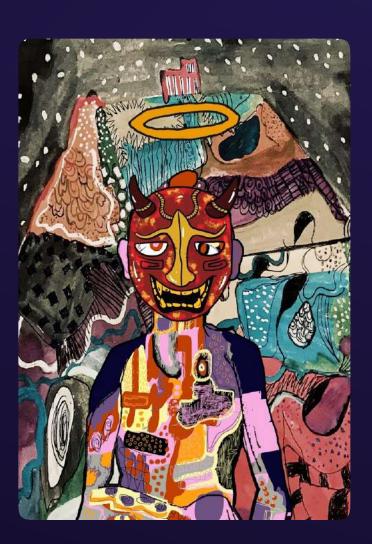

Vaulty is a decentralized platform designed to bring automatic asset allocation across DeFi instruments. Every vault has its own smart contract with predetermined logic.

Choose your vault and passively earn yields or NFT's stress-free. Vaults allows users to minimize network fees and time spent researching the best instruments.

Vaulty unites the power of DeFi and NFT

## The Model

Commercializing will be done through Pancakeswap's liquidity pools. Liquidity providers will be attracted by the distribution model: APY rewards and NFT rewards. Demand for \$VLTY will be driven by the opportunity to participate in staking and liquidity farming with NFT rewards.

Moreover, the price of \$VLTY is subject to constant buying pressure because of Vaulty's model. Service fees are applied to all strategies, which will be used for buying \$VLTY from the market.

Targeted audience: casual DeFi users, liquidity miners, and collectibles fans.

Targeted regions: Asia (Biggest NFT market), the EU, and the US.
